Subject: AR Related Info.: Dimock Removal AR File Update

Richard, Joanna & Humane,

Based on content received via email, we have updated the Removal AR Index for the Dimock Residential Groundwater Site. All new content pending final approvals appears in bold and includes an SDMS DocID for your convenience. Please let us know if there is any additional content to be added to the File or if we can go ahead and finalize this update.

Thanks,

Paul,

You have the wrong Richard. Richard Fetzner is/was the OSC of record for the Dimock site. Fetzner is on vacation this week.

Let me know if there is anything I can do to help.

Rupert.

Subject: Updated Administrative Records for Dimock

Richard & Joanna:

An updated Administrative Records should be completed for the Dimock Groundwater Investigation Site Removal Action. The goal should be to document reasons for spending levels above those documented in the original AR. My hope is to minimize the amount of work you need to do to complete this task. If you'll identify the Action Memo's etc. used for increased funding on OSCNET, I'll go out and capture them. If you have other documentation that supports your decision for increased spending - simply identify those records and I can grab them as well. Any records that support your decision for increased spending that are not on OSCNET, I'll ask you to forward.

The goal is to avoid turning this into a big effort - but considering the number of interested parties in this site/Action - making sure our documentation is in order now could end up paying big dividends later.

Please let me know if you have any questions or need additional information from me.

Thanks,

Paul
